Is the spending sustainable and will it lead to sustainable improvement?

The spending is sustainable as long as the Sports Premium Funding is available. Some of the areas of funding are costs that will not be repeated e.g. I-pads/play equipment. Funding to allow more children to participate in extra-curricular sporting activities will need repeating year on year for the provision to be sustained. However, the development of children's knowledge and participation in local sporting activities will lead to an overall improvement in sporting skills, health and fitness.

Will the Sports Premium Funding have an impact?

Sports Premium Funding is already showing an increase in the numbers of children taking part in extra-curricular activities. There has been more than double the numbers of children participating in sports clubs. An aim of Sports Premium funding is to get more children taking part in sporting activities after school and we hope that by using local Leek sports providers that parents will be able to access these clubs for their children if their finances allow.
